Many other arch-acologists have visited the ruins in the fast hundred years, but from the time of Dupals no one, with the exception of Ayme, in 183, made excavations until Mr. Saville visited the ruins last year and ands some preliminary excavations pre-saratory to his work of this winter. Most of the archaeologists who have Othertic visited the rains have described ess mounds of earth" without foundahave speculated as to why the builde should have erected such beautiful structures without bases. Professor Savilli believed that the buildings did have tuse and that the dust of ages had cover thom. Following this theory, he set to work removing the earth around the buildings and a little digging proved that

Having found the inner line of the bas of the buildings, Professor Saville set his men to work to find the outer bases, and
